### Old Lens, New Life—Snapped, Priced, and Posted!

It's time to clear the clutter and all the 'things' we no longer use. How about the camera lens that David left behind when he went to college, which we no longer use? How can we sell it on Facebook when we know nothing about it?

I took a picture and uploaded it to ChatGPT. I then asked it to create an ad and set the price. The photo was essential so ChatGPT could identify the item. BTW, I also checked the price on Amazon - \$99.
